

Oky,TM the key against germs.

MADE OF BRASS
A COPPER AND ZINC ALLOY,
THE ANTIMICROBIAL OKY KEY
MAKES IT POSSIBLE TO
AVOID DIRECT CONTACT
WITH EVERYDAY OBJECTS,
WHILE REDUCING THE
LIFESPAN OF GERMS ON
ITS SURFACE AND
THEREFORE REDUCING RISK
OF CONTAMINATION.*

- 1 Rounded design for more comfort for fingers.
- 2 Angled tip to solidify the grip.
- 3 Textured edges for easy adhesion to surfaces.
- 4 Key ring included.
- 5 Integrated bottle opener.
- 6 Pointer suitable for some touch screens.

Oky contains more than 65% copper maximizing its antibacterial action.

Avoid direct contact with:

- door handles
- touch screens/ATMs
- public toilets
- public taps
- payment terminals
- urinal
- trash lids
- handles in subways/buses

*The Oky key is a complement to hygienic measures and does not replace public health guidelines against Covid-19. Brass does not eradicate pathogens right away, but shortens their lifespan considerably when compared to other surfaces such as plastic and cardboard. Hand washing remains the best protection against the coronavirus.
